Every day, more than **2000** patients are waiting for an organ transplant in Hong Kong.

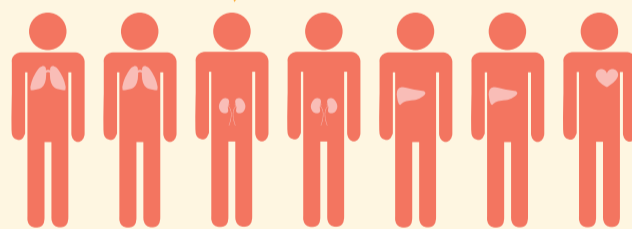

Remember the "3S" for supporting organ donation

Only **1** in **2** deceased patients suitable for donating organ can successfully donate their organs. One of the major reasons is due to family refusal.

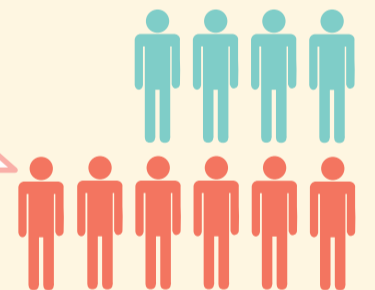

1 in **2**

of Hong Kong population is willing to donate organ after death.

An organ donation decision can potentially save **7** lives.

For those who are willing to donate their organs, **6** in **10** have expressed their wish to family members.

Only **3** in **100**

Hong Kong adult has registered on the Centralised Organ Donation Register.

More than **90%** of Hong Kong population, upon learning of their family members' wish to donate organs, is willing to honor such wish.
